

# Solar Battery Installation Process Checklist

1. Use [this guide](#) to find out what type and size of solar battery that best suits your electrical needs.
2. Find as many battery installers as you can find and request a quote from each of them. Alternatively, use [Batterybasket](#).
3. Select the most appropriate company from the quotes you have received based on their reputation, reviews and proposed price.
4. Sign the contract and pay the deposit. The installer will then arrange a time to inspect your house and existing solar system.
5. Check with your installer whether your solar panels are battery ready, battery upgradeable or if you'll be required to purchase any additional hardware.
6. Find out the exact specifications of your battery by asking you installer [these questions](#).
7. Contact your home and contents insurance provider. Find out if they'll cover your new solar energy storage battery, and if so, what coverage will they provide?
8. Contact your electricity retailer and let them know you are going to install a solar battery.
9. Arrange a time for your battery system to be installed. Be prepared to sign the final contracts and make additional payments.
10. Arrange a time for your installer to check everything to make sure it is functioning properly.
